SUMMARY

Before I decided to transition my career into tech, I was very passionate about the animal field. I liked what I did but there was never much room for creativity, so as a creative outlet I started to learn how to code after work. After coding for a while, I found it was my real passion and decided to join a 12 week, accelerated, and fully immersive front end program with Grand Circus. So far I've learned how to properly intertwine HTML, CSS, and JavaScript to make them function seamlessly. I'm very excited to be able to use these newly honed skills, my ability to problem solve, and my passion for creativity to be a great addition to a team.

EDUCATION

Grand Circus Front-end Bootcamp Detroit, MI

April 2020 – June 2020

Projects include: [POS: <https://ccecott.github.io/JAVASCRIPT-PROJECT-POS/#>]
